

Build your own bug house

Bug House

Northern Ireland Forest School Association

 Build a Bug House 

You don't need a lot of materials for this one.

- * A pair of scissors, newspaper and plant pot or a plastic/milk bottle with the top cut off.
- * Cut the newspaper in half and roll the strips tightly.
- * Place them into the plastic pot.
- * Pop it somewhere in the garden.
- * Have a look in a week or so and see what bugs have moved in.
